Summary

Full-Stack Developer specializing in MERN stack with experience building scalable and real-time applications. Improved performance and user experience through optimized APIs and efficient system design.

Skills

Languages: JavaScript, Python, Java, HTML, CSS

Frontend: React.js, Bootstrap

Backend: Node.js, Express.js

Database: MongoDB, MySQL

Concepts: REST APIs, JWT Authentication, MVC Architecture, Error Handling

Tools: Git, Postman

Projects

TOTO – AI Code Assistant (React, Node.js, MongoDB)

- Built AI-powered code generation platform serving 100+ user queries
- Designed REST APIs reducing response time by ~20%
- Implemented JWT authentication ensuring secure access control

AI Interview Platform (React, Node.js, MongoDB)

- Developed full-stack platform handling 50+ practice sessions
- Improved backend efficiency by ~25% using modular architecture
- Created dynamic workflows increasing user engagement

Video Calling App (In Progress) (WebRTC, Socket.io)

- Developing real-time communication with low latency (<300ms)
- Integrated chat + video features for seamless interaction

Education

B.Tech Computer Science — Lucknow University (2023–2027) | CGPA: 8.0

Achievements

- Solved 90+ DSA problems on LeetCode across core topics
- Built 3+ full-stack applications with real-world use cases
- Strong debugging and problem-solving skills
